I don't believe this.

The following is copied directly from the pdf version of our constitution which I downloaded from the Supreme Court website.

Airteagal 42.3.2

Ach ós é an Stát caomhnóir leasa an phobail ní foláir dó, toisc cor an lae, é a dhéanamh éigeantach minimum áirithe oideachais a thabhairt do na leanaí i gcúrsaí moráltachta, intleachta agus comhdhaonnachta.

It contains an English word. The whole constitution is gone. Someone must get this to the President today. This is a matter for the council of state. What are we going to have next, a german word. No wonder the department of education can claim that they don't have to fulfil Article 42.3.2. This is far more important than any budget meeting. This is a constitutional crisis.

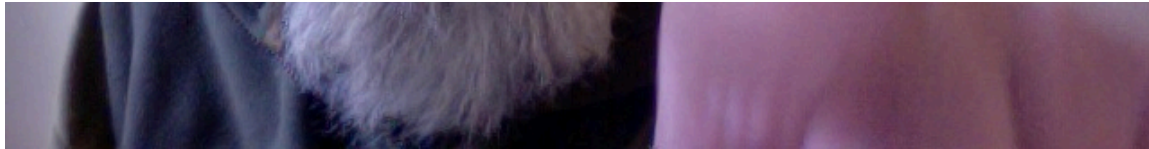

Comment 1

I just realised that the Government cannot pass the budget, since the constitution is broken. Angela won't like this. We got you.

We have no valid government. The constitution is a whole document and if one part of it is broken, then it is all broken.

Attached is the copy of the constitution that I downloaded.
